

BDNA® Services Overview

BDNA's Professional Services team is focused on enabling customers to make the best technology decisions for their enterprises which helps them achieve their objectives. With core enterprise initiatives being top of mind, the sense of urgency to successfully execute is high.

Having clean data at your fingertips puts enterprises in a solid position to make decisions that affect the economic well-being of an organization.

Designed to address your organization's specific needs, BDNA Services offerings facilitate your BDNA Data Platform implementation, adoption and customization — helping you maximize your return on investment.

BDNA Normalize Service Offerings

Learn how to successfully deploy BDNA Normalize™ on specific platforms:

- ServiceNow
- HPE
- BMC CMDB

BDNA Normalize® implementation packages provide guidance on planning, installation and configuration, data extraction and discovery, and initial operations within the respective platform environments.

Training Workshops

BDNA workshops are designed to enable customers to leverage BDNA solutions, helping with internal adoption and usage.

- BDNA Data Platform API Workshop - Learn to access data from BDNA Technopedia®, BDNA Normalize and BDNA Private Catalog
- BDNA User Console Analyze Workshop - Learn to create reports using the BDNA Analyze™ Console
- Clean Data Adoption Workshop - Learn effective Technopedia implementation strategies in this two-part session workshop, consisting of an executive session and a technical session

Contact your designated BDNA representative or info@bdna.com for more information.
